

Q-board

compact desktop keyboard

 BAKKER ELKHUIZEN

Work Smart - Feel Good

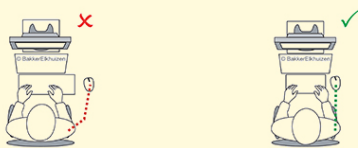

Ideal for the fixed workstation

The Q-board is an ergonomic compact keyboard with a deep desktop key touch.

Thanks to its compact format the reaching distance to the mouse is shortened, preventing excessive strain.

A compact keyboard does not have a numeric pad. For this reason, the mouse can be placed closer to the keyboard. Research has shown that 90% of keyboard users seldom, if ever, use the numeric pad. Working with a compact keyboard results in greater comfort because it reduces the reaching distance to the mouse (Cook, C., et al., 1998). This puts less strain on the shoulder and forearm.
